

Toolbox products are individual activities or exercises that are designed to improve or develop individual skills, or to raise awareness of important organisational issues. They usually last for 20-90 minutes, are designed for small groups and require a limited amount of preparation and administration.

Toolbox activities can be run by any competent facilitator and do not require additional trainer training support from RSVP Design.

Powertool products are more complex, extended activities that address more interlinked management and leadership skills. These activities last from 2 -8 hours and cater for larger groups - generally up to 30 people, or multiple groups working in parallel. Powertools need a higher level of administration and supervision and more input from RSVP Design, either in trainer training or in initial facilitation.

RSVP Design also offer fully designed and resourced one-day workshops, which have been prepared so that they can be purchased then delivered by corporate or independent trainers. These workshops use our experience and methods, along with integrated toolbox products, to develop a broad range of individual, team and management skills
