

A new learning tool from RSVP Design Ltd's partners in the USA - Interel

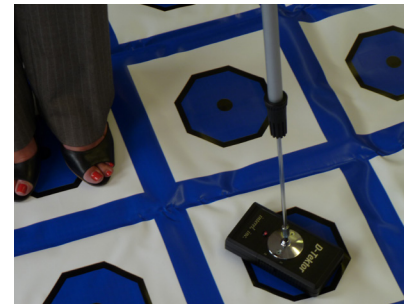

Do you need a low-cost, versatile and absorbing team challenge to motivate your learners and build rapid team co-operation through effective communication, careful planning and strong leadership and coaching?

Interel, our partner organisation in the USA, has developed this lightweight and affordable alternative to their highly successful Electric Maze® activity. The Global Maze provides many of the benefits sought by Global organisations such as Intel, Motorola, Wal-Mart and FedEx, but in a lightweight design contained in its own International approved carry-on case.

This activity is a completely programmable device allowing learning designers flexibility in creating successful pathways through the Maze in order provide a safe environment to build skills and rehearse effective behaviours.

The Global Maze is suitable for groups of 4 to 24, working indoors or outdoors on the supplied 74" x 98" (188cm x 249cm) vinyl mat, containing 48 squares. The activity comes with its own wheeled aircraft carry-on case, 16.5"x14"x9" (42cm x 36cm x 23cm) containing all the required materials with a total weight of 20 lbs (9kgs).

By inserting or removing RF tags on the underside of each square on the vinyl grid, each square can be programmed to set off an audible alarm when the lightweight hand-held detector is placed on it. This creates many possibilities for 'safe' paths of varying complexity to be created.

The Global Maze gives teams a powerful and exciting learning experience with little physical effort. The effects of change, performance improvement, leadership, competition and many other learning areas can be explored in a single, or series of increasingly demanding tasks using this activity.

By adding constraints such as working in silence or with restricted communication, or by increasing time or quality standards different aspects of teamwork, control and supervision can be explored.

'Thank you so much for recommending the Global Maze for use in our training at FedEx Trade Networks. With the global expansion of our company (and our training), we found ourselves in need of an additional model – ideally, more suitable for travel. The new, portable version definitely fits the bill! Having used the original Electric Maze for many years, we found this version to offer the same great learning outcomes in a more lightweight, easy to assemble format. It has also been more cost-effective to ship to our offshore locations. We've enjoyed using it and have found it to be the perfect complement to the original model that always enhances our learning objectives. Great product!'
